(54) MOLDING MATERIAL, INTERIOR MATERIAL MADE THEREOF AND PRODUCTION OF HOLDING MATERIAL

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a molding material giving a molded article or interior material having high rigidity.

SOLUTION: This molding material is produced by impregnating a thermosetting synthetic resin in a mixed fiber aggregate containing 99.5-50 wt.% hydrophobic fiber and 0.5-50 wt.% hydrophilic fiber. The interior material is composed of a base material produced by curing the thermosetting synthetic resin in the molding material and a surface skin material bonded to the surface of the base material.

LEGAL STATUS

[Date of request for examination]

07.02.2006

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
